

# Ngalam Language

Challenge :

**Problem:** Write a program that reads a string and reverses the string, but using the Ngalam language. Ngalam reverses all letters except when the letters "n" and "g" meet, these two letters ("ng") will remain unreversed (example: malang -> ngalam, mangan -> nangam).

Example :

- **Input:**

```
malang
```

- **Output:**

```
ngalam
```
