

Person

Challenge :

Problem: Define a `Person` struct with attributes `name` , `age` , and `height` . Write a program to print the information of `n` people.

Example :

- **Input:**

```
2
John 25 175
Alice 30 160
```

- **Output:**

```
Name: John, Age: 25, Height: 175
Name: Alice, Age: 30, Height: 160
```
