

Comparison

Challenge:

Problem Description:

You are given two integers a and b . Your task is to determine if a is greater than, less than, or equal to b .

Input:

- The first line contains two integers a and b .

Output:

- Output the string $a > b$, $a < b$, or $a = b$ depending on the comparison.

Example:

Input:

5 10

Output:

$a < b$
